LOCAL WEBSITES TOOLMAP  
V1.0 NOV.2022

This instrument is designed to help you find local websites, locate their area of interest on the map and access them rapidly to visualize their layout. Using the buttons, you can easily navigate through.

For convenience, the country is divided in 10 geographical areas included in the main historical regions. You can access them quickly by clicking on the corresponding color on the main map.

For each region, you can see the websites we are collaborating with, and you can open them in the browser by clicking the buttons.

For each subregion you can see in an additional slide some aggregate info by county regarding the traffic data.

Some websites claim regional coverage in Transilvania and you can see them in a separate section.

Due to the variety of the formats and prices, please contact our sales team for personalized offers.

Some sites do not provide traffic data yet, so consider the figures are the minimum values for respective counties. Source of traffic data: SATI, trafic.ro, internal websites data.

Note some websites in Transilvania are in Hungarian language.
